

BDK.81

TECHNICAL CHARACTERISTICS

- Temperature of the environment -30 to +50 C
- Pressure of gunpowders gases in the tube $P_s=100$ bar
- Range minimum 100 m
- Activating an electric lighter
- The weight is 3,92 kg.

NOTE

It is intended for firing smoke boxes filled with an internal mixture designed to create short-term smoke curtains and smoke covers for masking and blinding of living, moving and immovable targets, narrow zones and objects during the execution of various combat tasks.

Lanser is 81 mm in diameter

BDK.82

TECHNICAL CHARACTERISTICS

- Temperature of the environment -30 to +50 C
- Pressure of gunpowders gases in the tube $P_s=100$ bar
- Range minimum 100 m
- Activating an electric lighter
- The weight is 3,26 kg.

NOTE

It is intended for firing smoke boxes filled with an internal mixture designed to create short-term smoke curtains and smoke covers for masking and blinding of living, moving and immovable targets, narrow zones and objects during the execution of various combat tasks.

Lanser is 82 mm in diameter
